

Company OVERVIEW

Dyno Petro LLC offers a safe and reliable way to earn extraordinary returns in the oil and gas industry through our proprietary turnkey acquisition model.

We democratize significant returns, making them accessible to everyone, not just institutional investors. Over the past decade, we have invested tens of millions of dollars in developing a model that focuses on Proved Undeveloped (PUD) drilling locations in established producing fields, avoiding risky wildcatting ventures.

We conduct extensive third-party geophysical and economic due diligence on all acquisitions. By targeting financially distressed energy assets that can benefit immediately from operational improvements funded by an infusion of capital, we are able to predictably and reliably offer significant returns to our investors.

**EARN
12-15%
APY**

Dyno Petro LLC provides access to high-yield oil and gas assets at a fraction of the usual investment cost. Start with our offering today for as little as \$15,000 and earn income every month.

Our ADVANTAGE

Dyno Petro LLC uses a proprietary turnkey acquisition method to identify, underwrite, and acquire assets with high yield potential and long-term cash flow. Our highly motivated team of geologists, investors, and oil and gas experts consistently finds ways to generate stable returns regardless of market conditions.

TACTICAL

Dyno Petro LLC focuses on proved undeveloped drilling locations in established oil fields with high projected monthly recurring cash flows. Typically, wells have a payback period of 9-18 months and lifetime cash flows of 10-20 years.

METHODICAL

We target financially distressed energy assets that can immediately benefit from operational improvements funded by an infusion of capital.

PREDICTABLE

The fields we invest in have extensive infrastructure and existing wells that provide immediate cash flow, with additional upside through further drilling, recompletion, and rework operations. Our turnkey development plan quickly and methodically increases performance potential.

Producing Assets OVERVIEW

In the past **7 years**, **Dyno Petro LLC** has assets under management from **100+** different oil and gas development projects:

RISK MITIGATION STRATEGY

At Dyno Petro LLC, we are committed to protecting investor capital while generating consistent returns. Our strategy is designed to reduce exposure and enhance stability through the following approaches:

Diversification Across Multiple Projects

Capital is allocated across multiple oil and gas wells in various geographic regions and stages of development. This spreads risk and minimizes the impact of underperformance from any single asset.

Notes Fund Structure (Debt Investment Model)

Our offering is structured as a Notes Fund, similar to corporate bonds. This provides investors with fixed monthly Interest payments and prioritized repayment terms, reducing volatility compared to equity-based energy investments.

Focus on Proved Assets

We target Proved Undeveloped (PUD) and Proven Producing (PDP) reserves with verified production data and existing infrastructure. This ensures that capital is deployed into assets with a clear path to cash flow.

Operational Control & Oversight

Our team oversees every aspect of project execution - from acquisition to development - ensuring consistent performance and rapid response to any challenges.

Conservative Leverage & Strong Cash Flow

We maintain low levels of debt relative to asset value and ensure each project has positive cash flow before scaling. This financial discipline protects downside risk.

A dark blue circular badge with a white border is positioned in the upper right. It contains the text 'EARN' in a small font, '12-15%' in a large, bold font, and 'APY' in a medium font, all in white.

Achieving Consistent Returns in a **TURBULENT MARKET ENVIRONMENT**

This presentation includes “forward-looking statements.” These statements, which are not historical facts, reflect the Company’s current expectations or forecasts of future events. Such statements are subject to risks and uncertainties that are often difficult to predict and beyond the Company’s control, potentially causing actual results to differ materially from those anticipated.

Forward-looking statements can often be identified by terms such as “may,” “should,” “potential,” “continue,” “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” and similar expressions. These include statements about the Company’s global growth strategy. The statements are based on current beliefs, expectations, and assumptions and are subject to numerous risks and uncertainties, many of which are difficult to predict.

The Company provides this information as of the date of this presentation and does not undertake any obligation to update any forward-looking statements due to new information, future events, or otherwise, except as required by law. These forward-looking statements should not be read as guarantees of future performance or results and may not be accurate indications of the times at, or by, which such performance or results will be achieved.
